

MD 175S Profile

1.75" Snap Lock

Installation:

Can be installed over open frame steel purlins, steel decking, steel decking with polyiso, or plywood decking.

Available Widths:

12", 14", 16" or 18"

Substrates Available:

Galvalume - 22GA, 24GA
Aluminum - .032", .040"

Available Options:

Striations, Beads, Pencil Ribs
Factory made or field rolled to exact lengths

Ideal Application:

Residential, Institutional, and Structural

The MD 175 is distinctive for its broad width seam and impressive structural capabilities. Installation is simple and quick, yet withstands extremely high design pressures and is approved for use on Weather Tightness Warranty projects.

This continuous interlocking engineered roof system, featuring a 1-3/4" seam height, has a concealed fastener and clip application that allows thermal movement, ensuring weather tight integrity, with no mechanical seaming required.

Metal Direct
