

MD 200S Profile

2" Mechanical Seam

Installation:

Can be installed over open frame steel purlins, steel decking, steel decking with polyiso, or plywood decking.

Available Widths:

12", 14", 16" or 18"

Substrates Available:

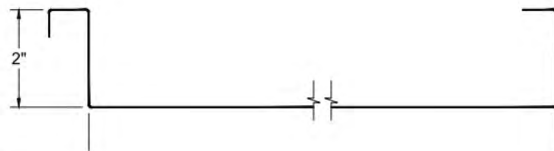

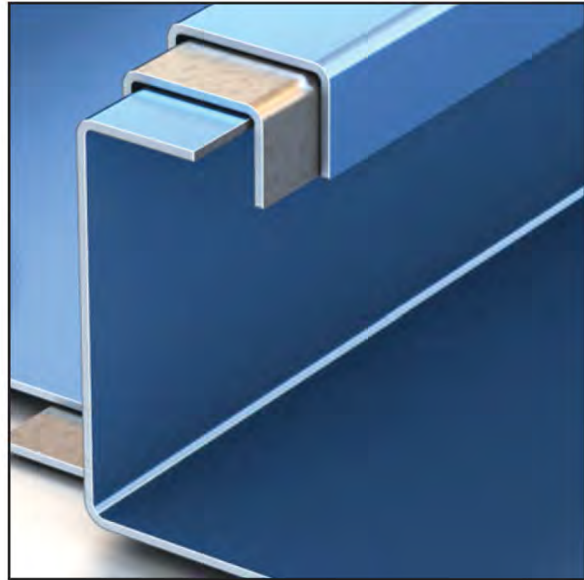

Galvalume - 22GA, 24GA
Aluminum - .040"

Available Options:

Radius Panel (Single or Double Lock),
Striations, Beads, Pencil Ribs
Factory made or field rolled to exact lengths

Ideal Application:

Commercial, Institutional, Structural, Open Framing, Low Slope Applications, Retro-fit

The versatility of the MD 200S roof system makes it an ideal choice for low-to-steep slope applications. This 2" mechanically seamed, structural metal roof system will meet or exceed almost all windload and government requirements anywhere in the country.

A smooth, uniform appearance is maintained with concealed fasteners and floating clip systems which reduces panel stress from fluctuations in temperature. This product can also be curved for large barrel roofs or small canopies.
